Data Profile

Coverage and quality of the NBP exchange rate data

The data passed all quality checks and is fit for analysis. Extreme daily moves reflect real market stress, so they are flagged as anomalies, not removed.

Exchange Rates Overview

How EUR, USD, CHF and GBP moved against PLN

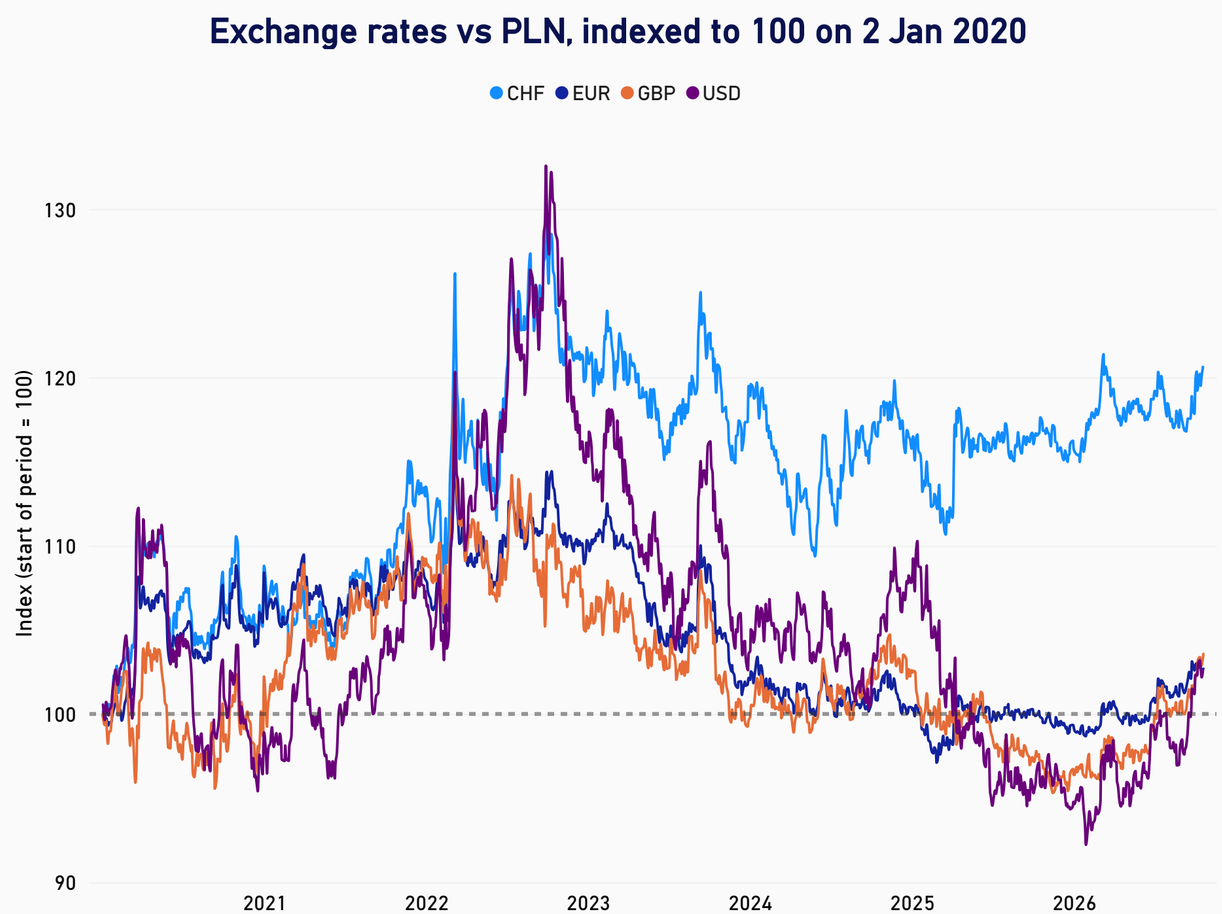

Period

01/01/2020 — 20/10/2026

Currency

Select all | CHF | EUR | GBP | USD

Currency	Start rate	End rate	Change	Min	Max
British Pound	5.0211	5.2003	3.6%	4.7854	6.0211
Euro	4.2571	4.3716	2.7%	4.1339	4.9647
Swiss Franc	3.9191	4.7227	20.5%	3.8992	5.1200
US Dollar	3.8000	3.8959	2.5%	3.5045	5.0381

In the selected period, CHF/PLN changed the most (+20.5%), while USD/PLN changed the least (+2.5%). A rising rate means a weaker złoty and more expensive imports.

Volatility and Risk

Which currency carries the most risk for importers

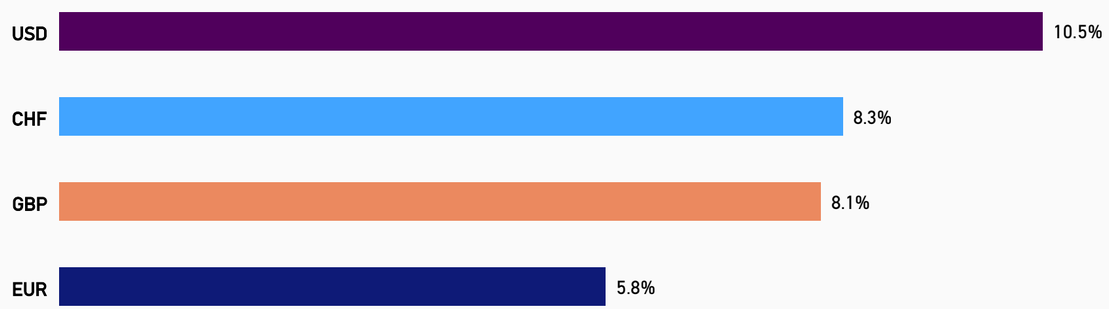

Period

01/01/2020 — 20/10/2026

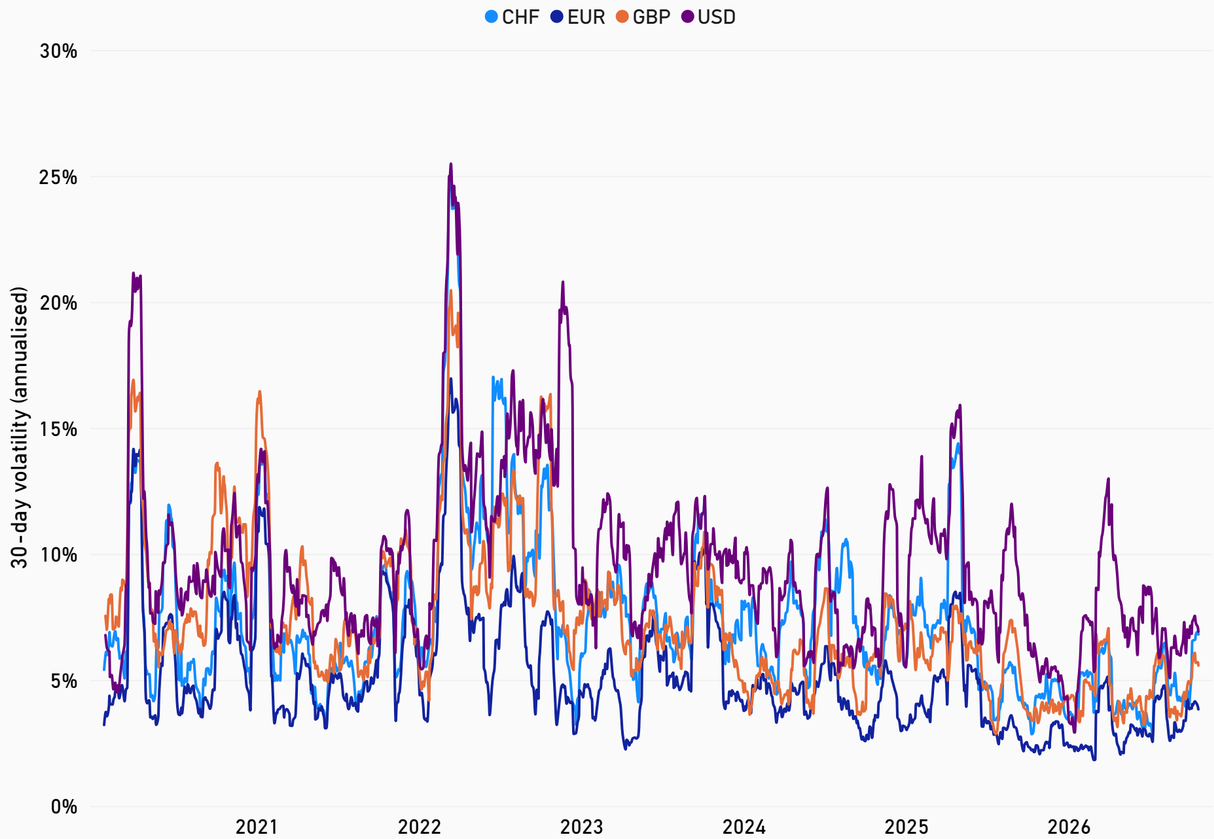

Currency

Select all | CHF | EUR | GBP | USD

Annualised volatility by currency

How volatility changed over time

USD was the most volatile currency in the selected period (10.5% annualised), and EUR the most stable (5.8%). Higher volatility means less predictable import costs.

Anomalies

Days with unusually large exchange rate moves

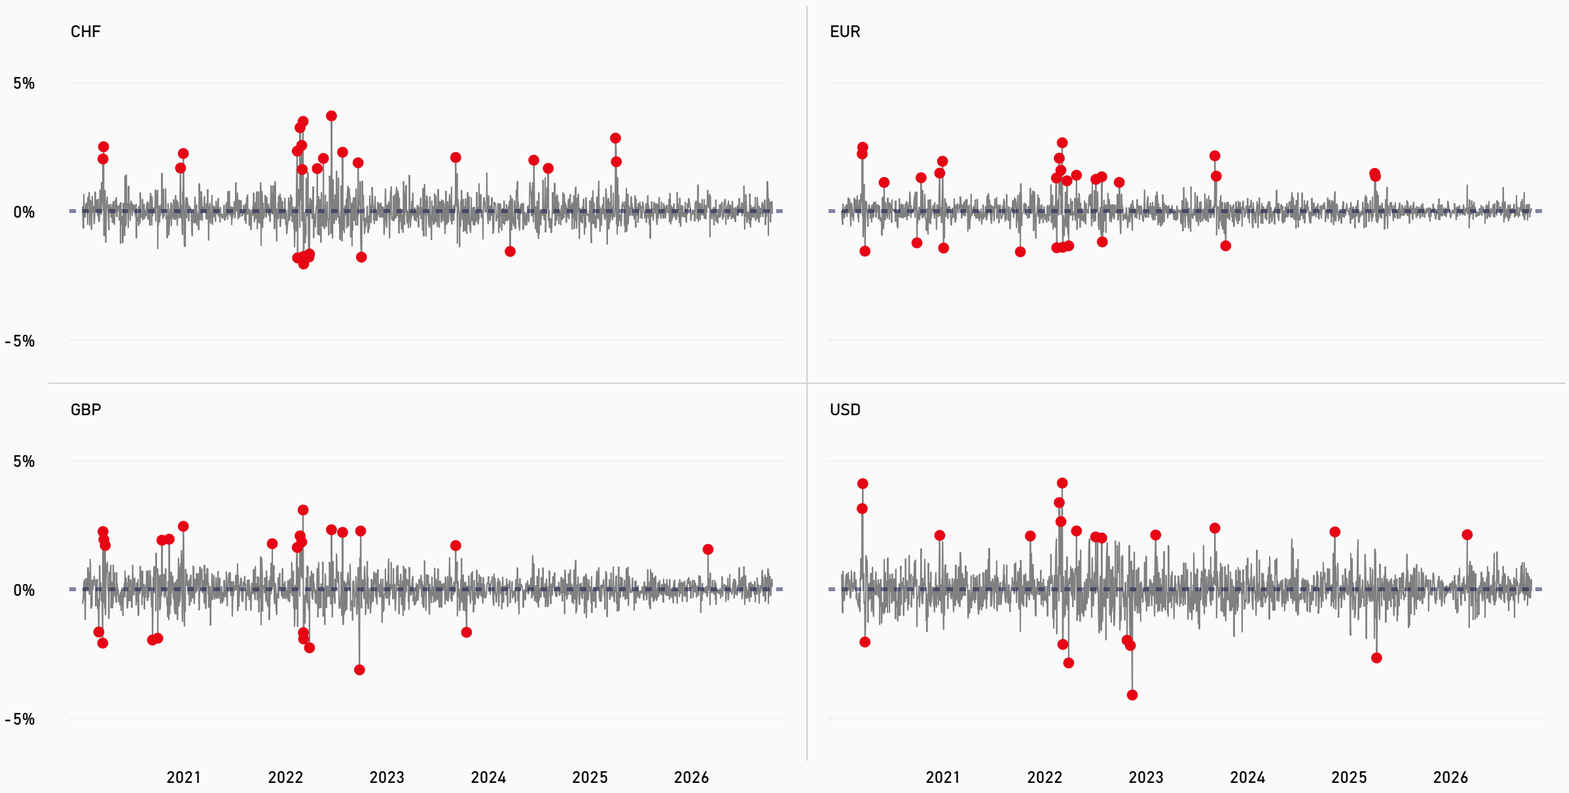

Period

01/01/2020 — 20/10/2026

Currency

Select all | CHF | EUR | GBP | USD

Daily rate changes and flagged anomalies

Currency	Date	Daily change
US Dollar	7 Mar 2022	4.13%
US Dollar	14 Nov 2022	-4.11%
US Dollar	19 Mar 2020	4.10%
Swiss Franc	17 Jun 2022	3.70%
Swiss Franc	7 Mar 2022	3.48%
US Dollar	24 Feb 2022	3.37%
Swiss Franc	24 Feb 2022	3.24%
US Dollar	17 Mar 2020	3.13%

The largest single-day move was +4.13% (USD, 7 Mar 2022).

A day is flagged when its change deviates from the currency's average by more than 3 standard deviations. Thresholds are calculated separately for each currency.
